RE: Draft Final Area 20A Remedial Enhancement Investigation Report
FAA William J. Hughes Technical Center

Dear Mr. Hupf:

Enclosed for your use are three (3) hard copies of the Draft Final Area 20A Remedial Enhancement Investigation Report and one (1) electronic copy on CD. This report addresses FAA's August 26, 2014 comments on the August 8, 2014 draft report and summarizes and evaluates the results of the remedial enhancement field activities conducted by TRC during March 2014. TRC recommends conducting a limited "data gap" investigation at Area 20A. The results of remedial enhancement study and the limited "data gap" investigation can then be used to design the full-scale remedial enhancements at Area 20A.

If you have any questions regarding this document or would like to discuss the information contained within it, please do not hesitate to contact me at (860) 298-6225.

Sincerely,

TRC Environmental Corporation
